

Samsung Air Conditioning System, R32, Wall-Mount, Elite Wind Free, 2.5kW Stay comfortably cool without feeling cold

Wind-Free™ Cooling

Stay comfortable cool with Wind-Free™ Cooling. It gently* and quietly** disperses air through 23,000 micro air holes, so there is no unpleasant feeling of cold wind on your skin. Its advanced airflow also cools a wider and larger area more evenly. And it uses 77% less energy than Fast Cooling***.

* ASHRAE (American Society of Heating, Refrigerating, and Air-Conditioning Engineers) defines "Still Air" as air currents at speeds below 0.15m/s which lacks the presence of cold drafts.** Tested on the AR12TXCAAWKNEU model. Wind-Free™ mode generates only 23dB(A) of noise, compared to 26dB(A) with the Samsung conventional model.*** Tested on the AR07T9170HA3 model, based on the power consumption of Fast Cooling mode vs. Wind-Free™ Cooling mode.

Motion Detect Sensor

Cool your home efficiently whether you are there or not. The Motion Detect Sensor detects if there is no movement after 20 minutes* and will automatically switch to the Wind-Free™ mode to save energy. You can also set it not to blow air towards you, or to follow you wherever you move.

Wind-Free™ Cooling (Energy Saving)

Save money every day with highly energy-efficient Wind-Free™ Cooling. When operating in Wind-Free™ mode, the outdoor unit consumes minimal power – using up to 77% less electricity compared to the Fast Cooling mode*. So you can stay comfortably cool without worrying about your electricity bills.

Tri-Care Filter

Keep the air hygienic and maintain the Heat Exchanger's performance with a Tri-Care Filter. Its 3-layers include a high-density filter that extracts large dust particles, fibres and animal hairs. It also has a Zeolite Coating Filter that captures fine dust, and helps to reduce viruses, bacteria and allergens*.

SmartThings

Control the temperature in your home anytime and anywhere. Using the SmartThings App* you can remotely control and monitor the air conditioner with just a touch. Or simply tell artificial intelligence (AI) system* what you want** and it does it. It even suggests the best settings.

Easy Filter Plus

Keep your air conditioner working efficiently with less effort. The Easy Filter Plus is located outside, on the top, so it can easily be taken out and cleaned. Its dense mesh keeps the Heat Exchanger clean and an anti-bacterial coating helps protect you against dangerous airborne contaminants*.

Auto Clean (3 Steps)

Keep the inside of your air conditioner hygienic by doing nothing! After it has been working, the Auto Clean function automatically dries the Heat Exchanger using a 3-step process. It removes moisture by blowing air for between 10 to 30 minutes. So it prevents the build-up of bacteria and odours.
